

Coding Challenge

Level 1: Understanding Logic

1. Even or Odd Checker

Write a program that takes a number and prints:

- "Even" if divisible by 2
- "Odd" otherwise

Concept: if condition

2. Positive, Negative or Zero

Take a number and print:

- "Positive"
- "Negative"
- "Zero"

Concept: multiple if-elif-else

3. Print Numbers from 1 to N

Take a number N and print numbers from 1 to N using a while loop.

Concept: while loop basics

◆ Level 2: Real Thinking

4. Sum of First N Numbers

Input: N

Output: sum from $1 + 2 + \dots + N$

Use while loop

5. Password Retry System

Ask user to enter password:

- If correct → print "Access Granted"
- If wrong → ask again
- Stop after **3 attempts**

Concept: while + if + counter

6. Multiplication Table

Input: a number

Output: print its table up to 10

Example:

$$5 \times 1 = 5$$

$$5 \times 2 = 10$$

...

Concept: loop + formatting
